

Recognizing Rift Valley Fever: FAO Animal Health Manual. 17 (Hardback)

By F. Glyn Davies, Vincent Martin

Food Agriculture Organization of the United Nations (Fao), Italy, 2003. Hardback. Book Condition: New. Language: English . Brand New Book. Rift Valley fever is one of the most significant zoonotic disease problems in Africa. The occurrence of the highly fatal haemorrhagic human disease syndrome, similar to Ebola and other haemorrhagic fevers, generates a degree of panic among the human populations at risk. RVF is highly contagious for humans if animals are viraemic at the time of slaughtering. In susceptible livestock populations, it is responsible for large numbers of abortions and stillbirths. However, one of RVF s greatest impacts is upon trade in livestock. Even if the disease tends to disappear after epizootics, livestock bans may last for several years, severely affecting the livelihood of pastoralists. This manual aims at helping staff from veterinary services and laboratories to recognize the disease rapidly when it occurs. It provides an overview of the disease, describes clinical signs and the most important differential diagnosis, and guides the user on how to proceed if a case of RVF is suspected.
