Excerpt: .ciphers to the divisor, and bring down the next period for a dividend, and use the divisor, as thus increased, for finding the next quotient figure. 3. If there is a remainder after finding the integer of the root, annex a period of three ciphers thereto, and proceed for the decimal of the root as if seeking for the integer, annexing a period of three ciphers to each remainder until the decimal is carried to as many places of figures as desired. Example.--Required the cube root of 47421875.6324. Example.--Required the cube root of 32768. Also, of 8489664. General Eule for extracting the roots of all powers, or for finding any proposed root of a given number. 1. Point off the given number into periods of as many figures each, counting from right to left, as correspond with the denomination of the root required; that is, if the cube root be required, into periods of three figures, if the fourth root, into periods of four figures, c. 2. Find the first figure of the root by inspection or trial, and place it at the right of the number, in the form of a quotient; raise this quotient figure to a power corresponding with the denomination of the root sought, and subtract that power from the left hand period, and to the remainder bring down the first figure of the next period, for a dividend. 3. Raise the root thus far found (the quotient figure) to...
