

## A First Course in Mathematical Analysis

By D. Somasundaram, B. Choudhary

Narosa Publishing House. Paperback. Book Condition: new. BRAND NEW, A First Course in Mathematical Analysis, D. Somasundaram, B. Choudhary, It is intended to serve as a textbook in Real Analysis at the "Advanced Calculus" level. Some of the welcome features of the book are motivation for the theory and abstraction through examples. Experience has convinced us that if Euclidean spaces are properly understood, it is a small jump to other spaces such as the space of continuous functions and abstract metric spaces. Topics like Field of real numbers, Foundation of calculus, Metric spaces, Compactness, Connectedness, Riemann integration, Fourier series, Calculus of several variables and Multiple integrals are presented systematically with diagrams and illustrations. Graded examples are provided to enable the students to understand the basic concepts of Real Analysis. This book would also be useful for students doing Engineering and Physics.

### Reviews

*Simply no words to spell out. It can be really fascinating through studying period of time. You will not really feel monotony at any moment of your own time (that's what catalogues are for concerning if you ask me).*

-- **Dr. Isabella Turner**

*This publication may be really worth a go through, and a lot better than other. It really is full of knowledge and wisdom. It's been printed in an exceptionally easy way. In fact, it is simply after I finished reading this publication by which basically modified me, affect the way I really believe.*
