It should be shunted by a small switchVso that it may be cut out when using the larger transformer. V By means of the. two double-pole double-throw switches shown in the diagram, either of the couplers may be connected to the valve detector. This does away with the dead end effects that are particularly noticeable on the two hundred meter wavelengths. This set may not look so well as the cabinet type of short wave regenerative receivers on the market for amateur use, but if properly constructed it will give equal results. The appearance of this set can be increased considerably by mounting it on a panel except the tuning couplers which should be mounted on the operating table. The telephones can be any standard make such as the Brandes or Murdock 2,000 ohm type which have been found to give equal if not better results than the telephones ordinarily employed. A fundamental wiring diagram appears in figure 1 and the assembled apparatus with all connections in figure 2. Some Receiving Circuits for Vacuum-Tube Apparatus IT has been the writer s good fortune to meet many hundreds of radio amateurs, and it has been his observation that their main concern has been to obtain the details of the design of a receiver that will permit reception over great distances for relay work. Although a variety of opinions and designs have...
