

Drug-Induced Dementia: A Perfect Crime

By MD Grace E. Jackson

AuthorHouse. Paperback. Book Condition: New. Paperback. 464 pages. Dimensions: 10.9in. x 8.2in. x 1.1in. Under the influence of declining birth rates, expanding longevity, and changing population structures around the world, the global prevalence of senile dementia is expected to increase more than four-fold within the next forty years. Within the United States alone, the number of affected individuals over the age of 65 is expected to rise exponentially from 8 million cases (2 of the entire population in the year 2000), to 18 million retirees (roughly 4.5 of the national census in the year 2040). Although they are striking, these statistics quite likely underestimate the scope of the coming epidemic, as they fail to consider the impact of under-diagnosis, early-onset disease, and the potential for a changing incidence of illness in the context of increasingly toxic environments. In the face of this imminent crisis, concerned observers have called for policies and practices which aim to prevent, limit, or reverse dementia. Drug-Induced Dementia: A Perfect Crime is a timely resource which reveals why and how medical treatments themselves - specifically, psychopharmaceuticals - are a substantial cause of brain degeneration and premature death. A first-of-its-kind resource for patients and clinicians, the book...
